BEGIN PROCESSING CREDIT CARDS NOW!

- Process payments from any computer in your business
- Improve efficiency of office staff
- Streamlines the check out process
- Authorizations in seconds
- Saves counter space
- Supports all major credit cards
- PCI Compliant Solution

The payment card industry is escalating security measures to avoid fraud and to better protect both the card holder and the merchant. Upgrades to comply with these new PCI / PADSS security requirements have already started, and by 2010 every merchant will have to be up to date to avoid interruption in processing. Hardware upgrades can be a costly affair knowing that a major part of terminals currently in use cannot be updated to comply with the new security standards. X-Charge continues to stay on the leading edge of security and compliance initiatives. We provide innovative solutions to help minimize the burden of compliance for our partners and merchants.

**A new PCI Compliant terminal can cost anything in the range of 500 - 1000 dollars!
Avoid unnecessary costs and sign up today for our integrated processing!**
